

SAP on Azure

- Managed by ZNetLive

Companies are significantly saving 40 to 60% in TCO with 60% savings in storage costs by moving their SAP environments on scalable public cloud platform Azure.

Research firm Gartner Inc reported that 2/3rds of all business leaders believe that their companies must pick up the pace of digitalization to remain competitive.

SAP on Azure gives enterprises an array of capabilities – agility, flexibility, scalability and productivity that they need to operate and excel in the digital era. This solution enables faster transaction process, increased efficiency for specific types of SAP workloads, agile provisioning of environments for the full application lifecycle – dev/test/prod/support, support for HA/DR and enterprise grade security and compliance.

Why Managed* SAP on Azure?

Managed SAP cloud solution enables you to deploy, run and migrate your mission critical SAP and SAP HANA workloads on the scalable and enterprise-proven cloud platform - Microsoft Azure, seamlessly; helping you to experience industry leading performance, simplified infrastructure management and benefits like higher uptime, innovation and less complexity.

Benefits and scenarios of SAP deployment on Azure

- Facilitates provisioning of SAP HANA dev test environments in minutes.
- Allows creating or cloning SAP environments for sandboxing or testing.
- Increases datacenter capacity- to serve new SAP projects and free on premises capacity.
- Allows provisioning of training environments with consistency, at lower costs.
- Enables archiving of historical system for governance and auditing.
- Provides cheaper storage and the ability of on - demand quick spin-up of production and dev - test systems.

Low Cost of Ownership

- Saves 40 to 75 percent over traditional hosting scenarios- faster provisioning of instances and deletion of events when complete or not in use.
- Provides environment for recovery purposes, without any additional costs.
- Reduces storage costs, enables data archiving for corresponding SAP systems.

Flexibility to shift from capital to operational expenditures.

Increased Agility & Scalability

- Facilitates purpose built hardware for SAP HANA workloads.
- Gives one the ability to scale SAP HANA Azure workloads up to 60 TB for OLAP and 20 TB for OLTP.
- Provides interoperability for shorter development cycles.

Improved employee productivity and business with systems of intelligence.

Increased Efficiency

- High availability and patched environments to run workloads.
- Provides rich development environment to build modern apps using higher level of Azure services – Office 365, Business Intelligence, Machine Learning etc.

Streamlined, best support and enterprise-grade SLAs.

With ZNetLive managed SAP on Azure services, you get commitment of unrivalled expertise and support for effective and rapid migration of SAP to Azure, helping you to overcome two most common migration challenges - cost and skills shortage. Gain optimized value for your investment with managed cloud services by ZNetLive.
